No discussion and no negotiations about open content anymore:

Article 14 – EU copyright law: "when the term of protection of a work of visual art has expired, any material resulting from an act of reproduction of that work is not subject to copyright or related rights, unless the material resulting from that act of reproduction is original"[1]

One thing less to worry about for the public

Still a lot has to be done – limited thinking and restricted opportunities

There is already a practising community out there finding new ways of communication and co-creation

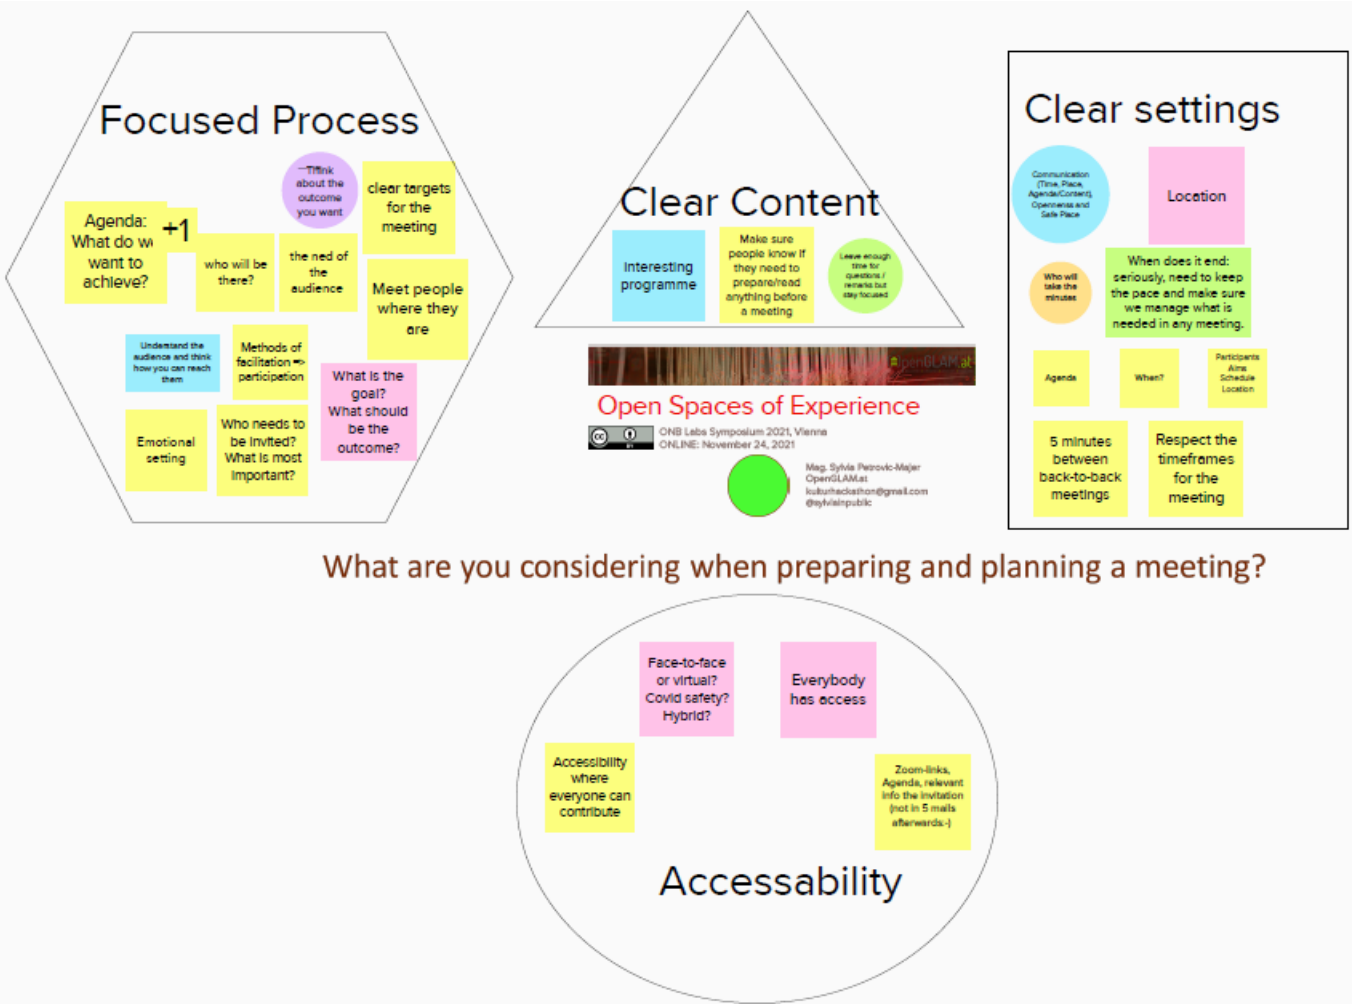
# P Preparation



What are you considering when preparing and planning a meeting?

Have you ever experienced that a project ended up in frustration ?

How exhausting is it, when you are in a project with „partners“ who are not committed to the project ?

# P Preparation

How to become an open society?

- Co-creation and collective wisdom: ask questions
- Growing and self-reflection: be a learner by deep listening
- Trust and relationship: build a community of exchange
- Purpose and meaning: sharing is caring!

It is not easy to change habits and thinking of hundreds of years

There is already a community out there practising, creating spaces of co-creation, self-reflection, trust and meaning

OPEN – JOIN – ENJOY

What are you doing in your organisation to take care of creating, exchanging, and making use of new knowledge according to your purposes?
