Preliminary results: Frequency

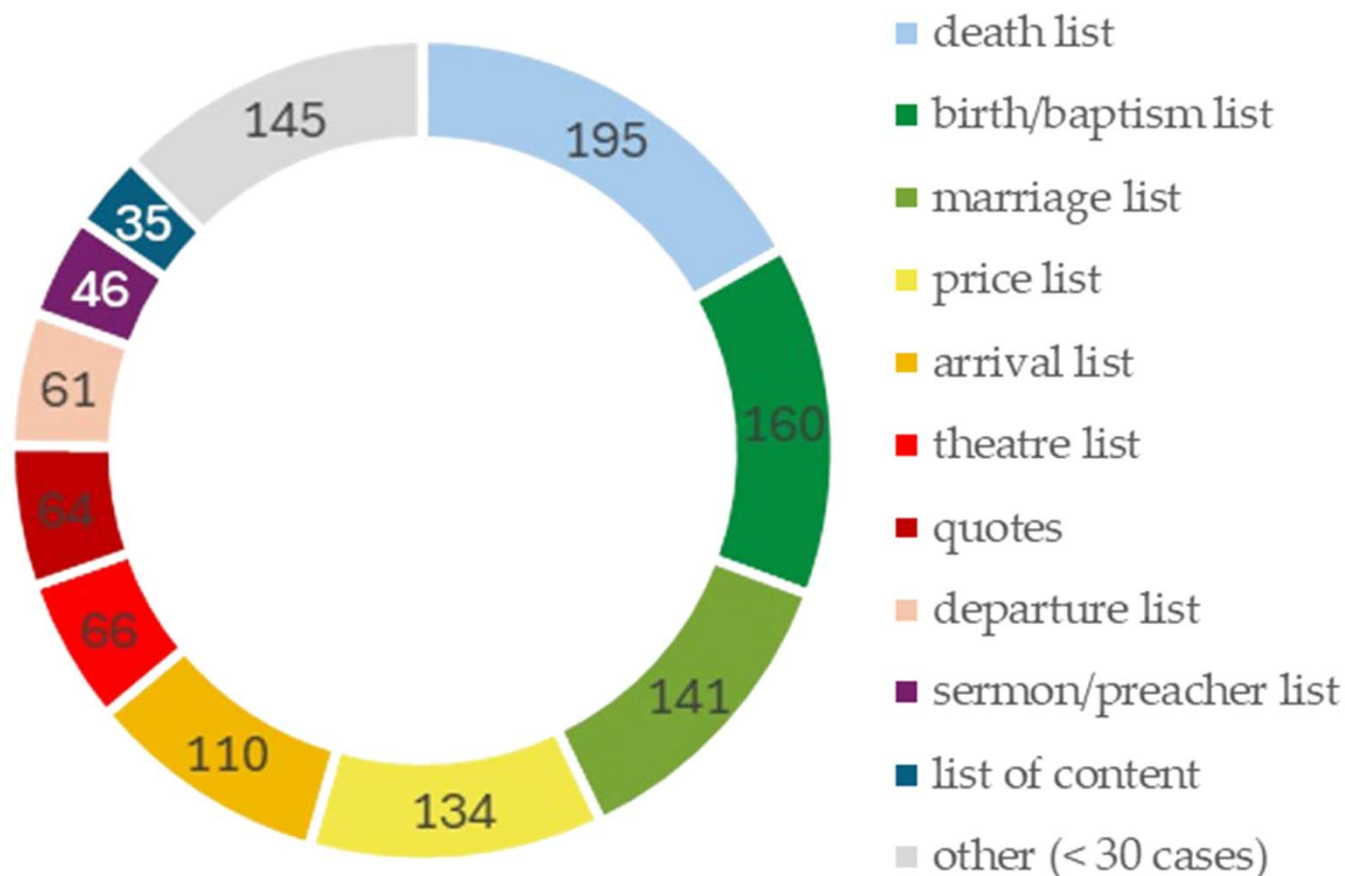

Work in
progress

- 1157 periodical lists (=list series) found (so far) – high absolute frequency
- 200 of 374 searched newspaper titles from Deutsches Zeitungsportal (= 53,5 %) published at least one list periodically – high relative frequency
- (not necessarily exhaustive – potentially even more cases)

➡ Interim conclusion: What's in the news? Lots of lists!

Taking a closer look at lists of content ...

Neumann (2021: 188): **mental orientation** (overview of content)
vs. **physical orientation** (quickly locating specific sections)

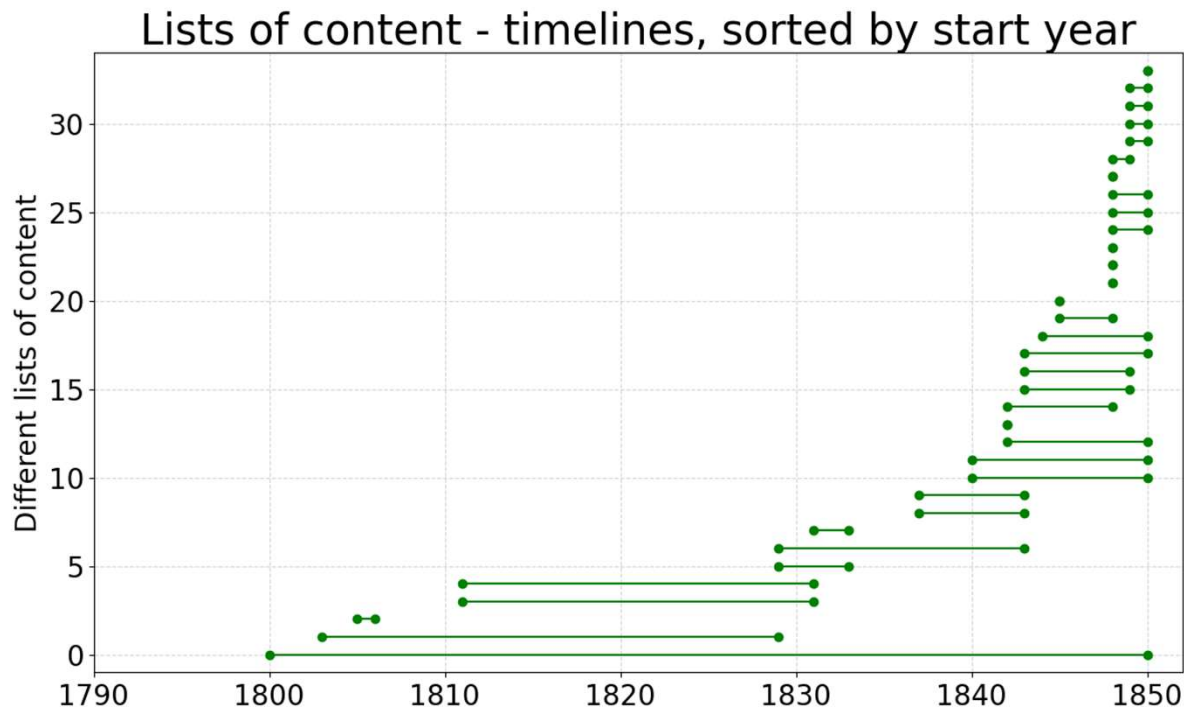

common characteristic in inspected historical newspapers
(34 of 35 cases): readers are **not** provided with page
numbers – focus on **mental orientation**

Aachener Zeitung, 30.10.1849: 1 /
Dresdner Journal, 22.09.1848: 1 /
Kölnische Zeitung, 24.07.1843: 1 /

Taking a closer look at lists of content ...

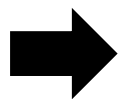

- 500 newspapers from 1600–1850 inspected so far
- lists of contents seem to first emerge in newspapers in the early 19th century (earliest finding from 1800)
- latest finding (1850) as only list of content providing readers with physical orientation (*Die Biene* – supplement of *Badische Landeszeitung*)

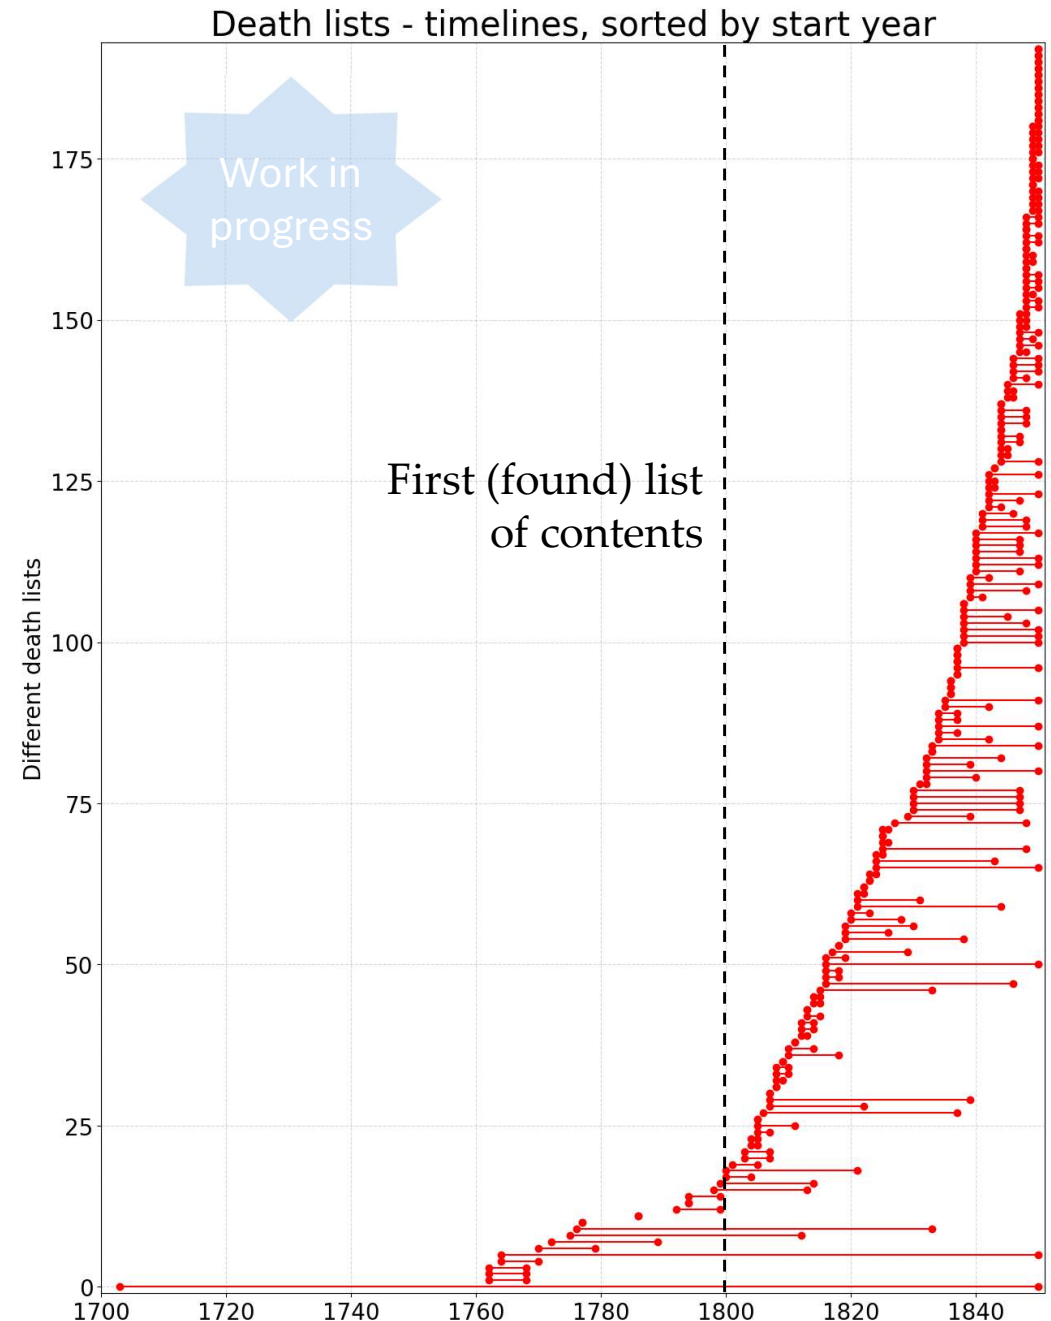

lists of content in newspapers as
emerging phenomenon of 19th century

... versus death lists:

Longer (and stronger) tradition
in early modern newspapers:

- significantly more findings
in the same set of news-
papers: 195 cases
- first example from 1703
(*Wienerisches Diarium*)
- multiple attested cases before
1800

+ further hints at establishment

Newspaper section: birth & death lists

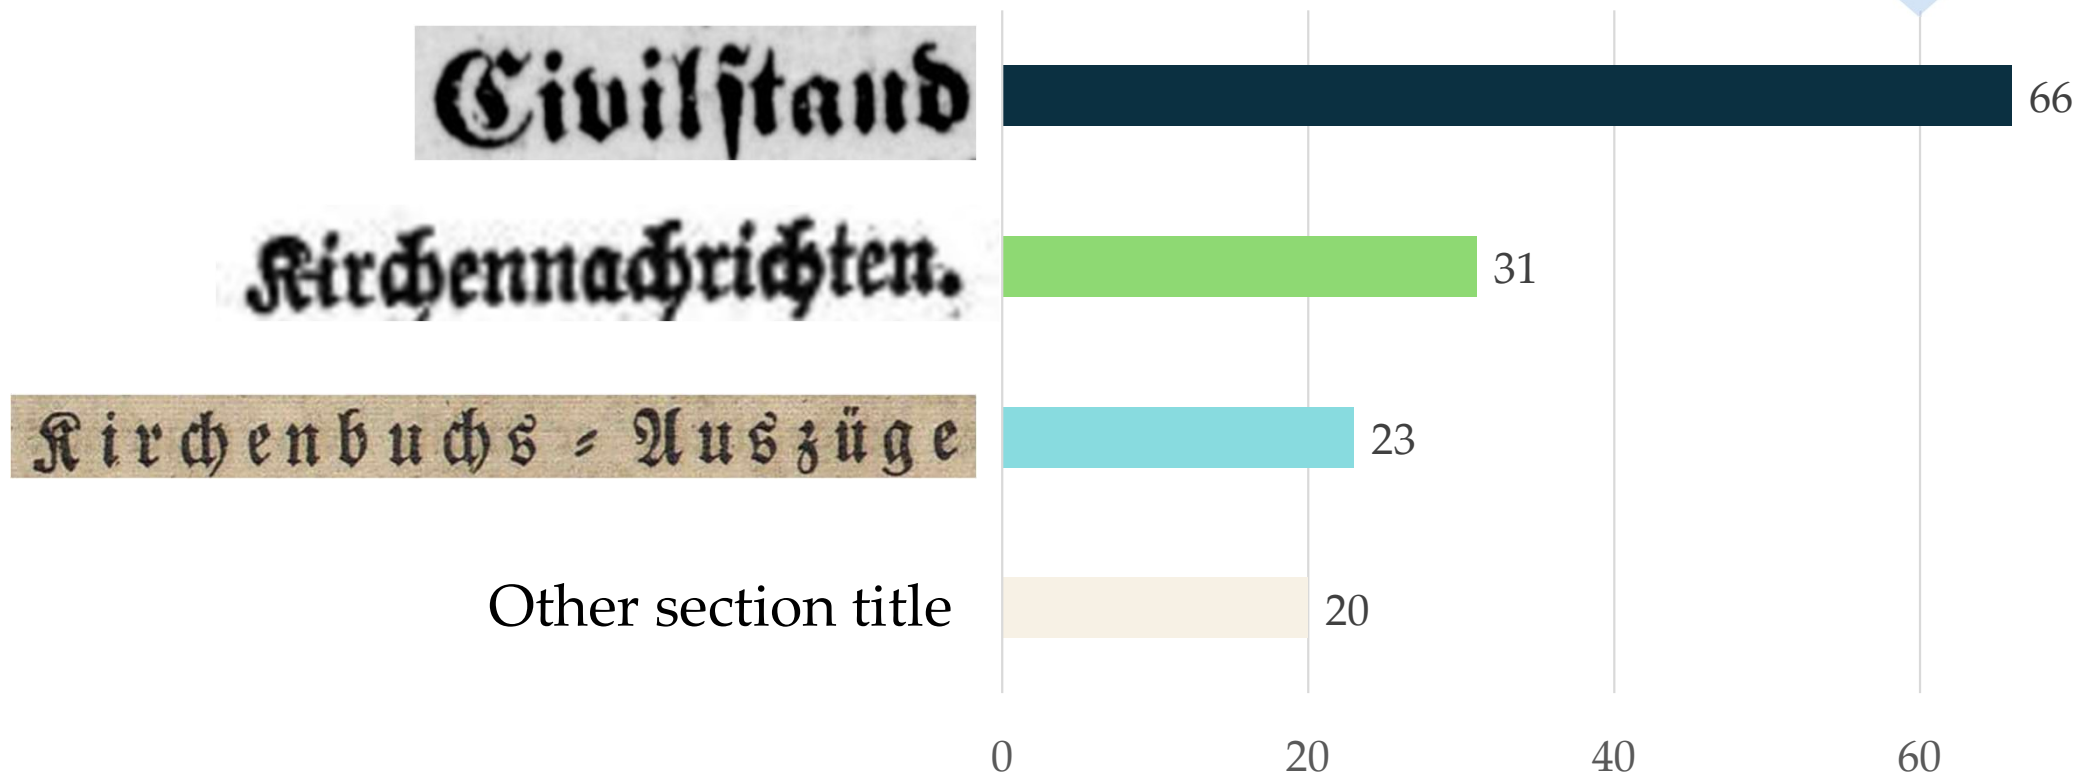

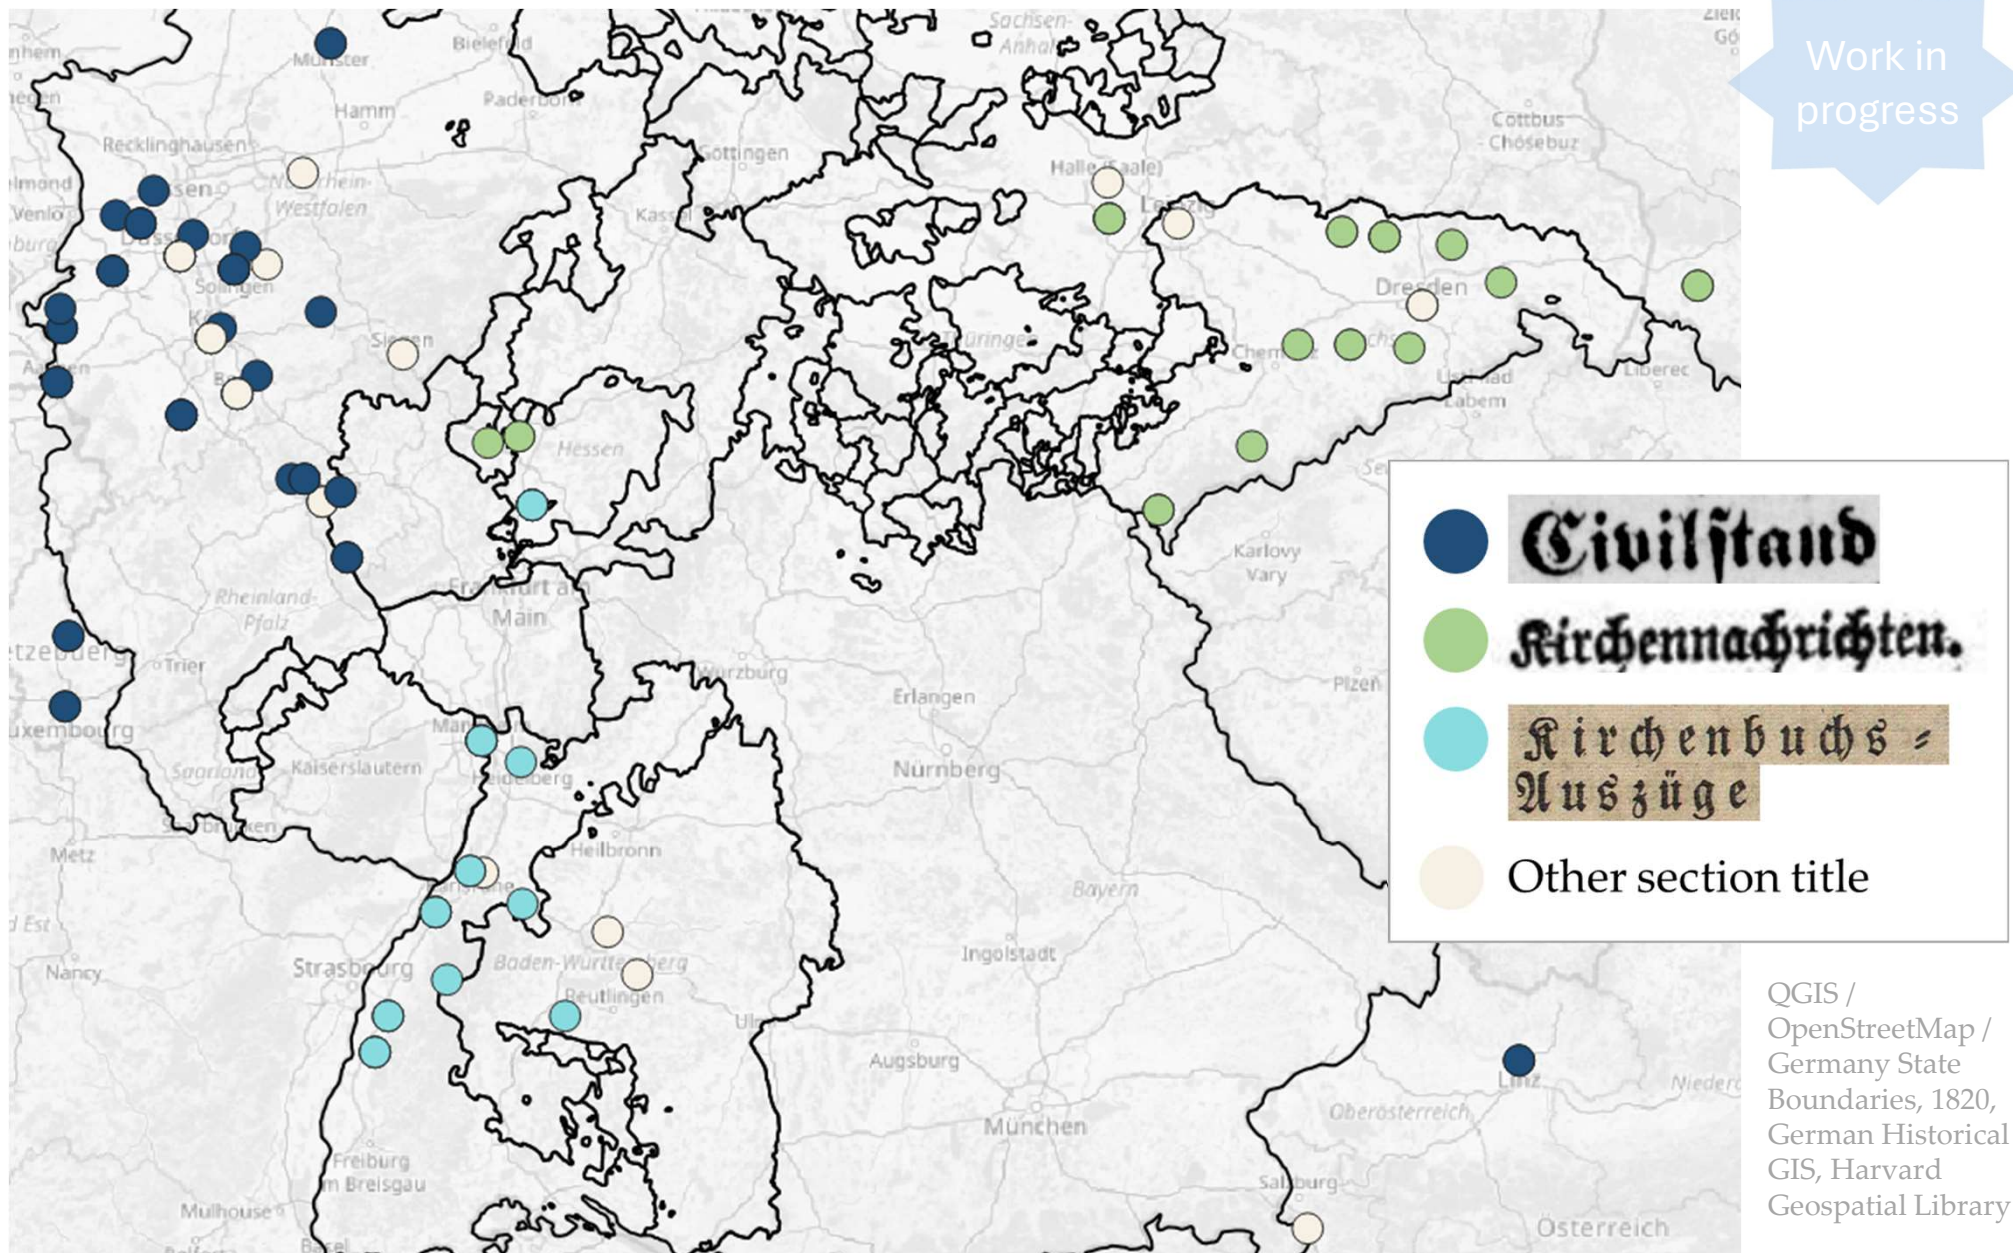

- 141 death lists (72,3 %) occur in a joint newspaper section together with birth/baptism lists
- frequently in combination with further lists, e.g. marriage lists, proposal lists, sermon lists
- recurrent naming traditions
